§ 19-910. A variance is a zoning adjustment which permits minor changes of City requirements where individual properties are uniquely burdened by the strict application of the zoning law. The Board cannot grant variations if the variation would adversely effect surrounding property or the general neighborhood.

A variance can be granted if the request for variance meets a hardship that is created by the land. By Law, the application must meet all of the following conditions:

- The strict application of the zoning regulation would produce undue hardship.
- Such hardship is not shared generally by other properties in the same zoning district and the same vicinity
- The authorization of such variance will not be of substantial detriment to adjacent property AND the character of the district will not be changed by the granting of the variance.
- The granting of such variance is based upon reason of demonstrable and exceptional hardship and distinguished from variations of purposes of convenience, profit or caprice.

No variance shall be authorized unless the board finds that;

- The condition OR situation of the property concerned OR the intended use of the property is not of so general or recurring in nature as to make reasonable practicable the formulation of a general regulation to be adopted as an amendment to the zoning regulations.
