Construction on Elm Street: will be from 13th – 17th Avenue and is scheduled to begin on June 1, 2021 at 7:00 a.m. Construction will include the street, sidewalks and driveways, along with water main replacement. As part of the water main replacement, new water service lines will be installed to the meter pit/curb stop, at which time a short interruption of service will occur. The contractor will contact each residence to schedule the water service replacement.

Elm Street will be closed to all traffic from 13th - 17th Avenue. Residents will need to use side streets and alleys for access.

Trash collection may be modified and residents are encouraged to contact Dean Sterling, Solid Waste Superintendent, for more information and directions for trash collection during construction.

Dean Sterling: 308-254-6071 or solidwaste@cityofsidney.org

Please have all vehicles, including trailers & recreational vehicles, removed from the street and driveways, as access will be limited during construction. Please mark sprinklers along the curb and sidewalk. Any sprinklers adjustment/repairs to sprinklers will be made by the contractor during construction.

Please remove any landscape/decorative items in the ROW to prevent damage during construction. The boulevard area in the ROW will be returned to the original condition. I.E., if the area is sod it will be returned to sod and if the area is paved it will be repaved.

Construction is estimated to be complete by September 1st, 2021.

Thank you for your cooperation during this project.
